Filled my new eyeglass prescription, using my existing frames. Cost was \$210, which was much less than the price quoted at LensCrafters and Vision Works. About a month later, a screw fell out and so did a lens. I brought glasses in and they fixed it immediately. Very good service.

Very knowledgeable about full range of issues. Took the extra time needed during my eyes' transitions after 2 cataract surgeries. Have been a repeat customer and will go back when I need new glasses. Friendly too.

Frame selection ranges from expensive to more expensive, but they are quality frames. The optician assumed that I wanted the highest quality lenses as well. Cost for ultra-thin, progressive, photo-chromatic, Crizal lenses in ultra-light Silhouette frames: \$680.

Very helpful and friendly staff. Helped me select a great looking pair of glasses and went the extra mile to help process my insurance claim.
